BOSPHORUS HAND MADE CYMBALS – ANTIQUE SERIES

The Bosphorus Antique Series marries the classic brilliance of the Traditional Series and the dry primal quality of the Turk Series.

The top side features an un-lathed bell and an additional un-lathed strip between the bell and the edge.

The bottom side of the cymbal is completely lathed in the traditional manner.

The rides express clean articulation and ample but controlled overtones.

The crashes produce a slightly mellowed tone with a quick decay.

Artists willing to experiment will love the many textures available from the varied playing surfaces.

BOSPHORUS HANDMADE CYMBALS – MASTER SERIES

The search for vintage cymbals has finally ended. Like all Bosphorus Cymbals, the Master Series are completely hand made. From the casting process through the final hammering, not one step is relegated to a machine. The alloy is from an ancient formula passed down by many generations of cymbal smiths. It gives these instruments a soft, "played-in" feel. Most importantly, the Master Series are much thinner than today's heavier weighted cymbals. You'll see the characteristic "wobble" made by the cymbal's edge when played. Listen for the woody stick sound and the deep mysterious tone.

BOSPHORUS HAND MADE CYMBALS – JEFF HAMILTON SIGNATURE SERIES

Developed by veteran jazz artist and Bosphorus co-owner Jeff Hamilton, this series captures the essence of Jeff's highly musical cymbal sound. The bell is slightly smaller than our Traditional Series, but speaks with distinction. The bowed profile tapers to a paper thin edge. The rides are sensitive enough for a jazz trio, but dig in and you can carry a big band through the shout chorus. Crash the 22" ride-explosive. Ride the hats half-open-pure tone. The china can bring down the house on a medium shuffle. Jeff covers the whole spectrum with this impressive line of Hammer Cymbals.

BPH22R	22"	Ride	\$759.00

BOSPHORUS HAND MADE CYMBALS – STANTON MOORE SIGNATURE SERIES

These cymbals capture the funky, earthy quality of Stanton's trademark sound. The tops are traditionally lathed with warm tonal grooves, while the bottoms are lathed with the distinctive wider ridges associated with the Bosphorus New Orleans series. The sound is 100% Stanton--raw, and aggressive, but always musical and extremely funky. The rides have great warmth, but plenty of stick definition. The hats are dark, but can really cut. The Trash Crash features uneven wobbly edges and deeply hammered pockets on the playing surface. The sound is trashy, as the names implies, but warm enough to ride on. The Pang Thang has flanged edges for piercing crashes with plenty of low end wash. Together they give Stanton the kind of balanced attack he requires as he takes traditional second line drumming into tomorrow.
