

Gibraltar's NRG throne modifies posture to enhance performance.

Sit on the new 9608NRG throne seat and you will notice a few things; first the seats shape takes the pressure off under your legs leaving them free to move, great for double bass drum players. Secondly, the angle of the seat is made to tilt the player a little forward, providing a power seating position.

The Gibraltar NRG throne puts you in the drivers seat for added comfort and power posture to enhance your playing style.

Features:

- Premium foam contoured throne seat
- Double braced tripod throne base
- Super-lock cast seat tension system
- Super Foot solid foundation rubber feet
- Memory lock at height adjustment
