

# Guitar Amps

Combos for electric guitar

## the cheeky d.'s

200  
watts

240  
watts

It has been a challenge for long and so here they are: The first AER amps for electric guitar.

Solid state input-stage and tube input-stage, tube distortion, and 200/240 watt high efficiency solid state power-amp.

According to AER's sound philosophy, the cheeky d. is extremely clear, powerful and direct. It offers the sensitivity and distinction to follow the smallest changes and provide you with enormous dynamic reserves.

On the contrary the d. 12"v, with its more classic approach, stays warm and smooth and has an eye for the vintage-orientated players.

For jazz, fast as hell for country-rock and fat and loud for rock'n' roll.

- 200/240 watts, dynamic control
- cheeky d. 10: 10" (250 mm) twin cone fullrange speaker
- cheeky d. 12: 12" (300 mm) AlNiCo guitar loudspeaker
- Single channel guitar combos
- 4 digital effect presets and distortion
- cheeky d. 10: 16 kg (35.50 lbs)
- cheeky d. 12: 17,20 kg (37.90 lbs)

### Inputs
