ABOVE PICTURED-AQUILA STRINGS BIONYLON (LEFT) & NYLGUT (RIGHT)

**Aquila Strings Made in ITALY**

*Introducing the Bionylon®, the first eco-friendly synthetic string in the world. These Ukulele strings are made of rounded, smooth Bionylon® monofilaments - a new material discovered by us- that also boasts excellent acoustic and mechanical properties. Bionylon® is, for its 67-70%, a plant's derivate (castor oil); this allows a reduction of the 50% of carbon dioxide's emissions in the atmosphere during the polymer- synthesis than the other common Nylons employed for musical strings. Warm and mellow performances!*

**AQUILA BIONYLON**

<b>AQ57U</b>	SOPRANO REGULAR TUNING, Key of C (all Bionylon® strings) GCEA (60cm String Length)	<b>\$7.99</b>
<b>AQ59U</b>	CONCERT REGULAR TUNING, Key of C (all Bionylon® strings) GCEA (76cm String Length)	<b>\$7.99</b>
<b>AQ63U</b>	TENOR REGULAR TUNING, Key of C (all Bionylon® strings) GCEA (76cm String Length)	<b>\$7.99</b>
<b>AQ67U</b>	BARITONE 4 strings, (all Bionylon® strings) , DGBE low D tuning (85cm String Length)	<b>\$9.99</b>

*The New Synthetic Nylgut, Until the mid-20th century Ukuleles were mounted exclusively in gut, a material that had been used for thousands of years and that combines excellent promptness of attack with brilliance of timbre - very different, in other words, from modern nylon strings. And until recently the typical sound quality of gut has been a constant point of reference for luthiers, composers and performers, This Improved Nylgut material has higher density than Nylon Strings.*

**AQUILA NYLGUT**

<b>AQ4U</b>	SOPRANO REGULAR TUNING, key of C (all Nylgut® strings) GCEA (60cm String Length)	<b>\$11.99</b>
<b>AQ5U</b>	SOPRANO LOW-G TUNING, key of C (1 wound string) GCEA (60cm String Length)	<b>\$12.99</b>
